

Job Title: Software Engineer

Responsibilities:

- Design, develop, and maintain scalable web applications.
- Collaborate with cross-functional teams to define and implement new features.
- Write clean, efficient, and well-documented code.

Required Skills:

- Proficient in Python and JavaScript.
- Experience with Flask or Django.
- Familiarity with RESTful APIs and databases like PostgreSQL.
- Knowledge of version control systems (Git).

Qualifications:

- Bachelor's degree in Computer Science or related field.
- 2+ years of professional software development experience.
